Method for Teachers to Engage with children

Modern educationalist, as per writer inspite of enjoying positive vibes of children's company, they are given importance to the negative vibes of not engaging with them. If someone has feelings of liking children, they will respond to someone's suggestion without showing disagreement. Those teachers who are blessed with this quality will have no need to interfere with freedom of children, but it is impossible for busy teacher to retain such quality. As per writer, education should not be anyone's whole profession. Children are getting careless when someone has not given time to them and outcome of fatigue express itself. There is need to make them realize that someone likes him instead of seeking the process of dealing with naughty children.

Title

Hot and cold weather's Effects on Human

As per writer, effects of cold weather are more pronounced in temperate countries. A cold weather acting as a hurdle in the path of stimulation of energy. There is presence of hopelessness if there is obstacles, and there is no space for caring oneself in the absence of hurdle. But a constant struggles against all challenges turn into hope. There is hopelessness of man with worsening of weather. To keep himself warm, he should construct strong houses and wear warm clothes. In order to meet ^{the} need of body, he has to cut-down trees and save plenty of food for himself. Whereas, in case of tropics, there is no need of warm clothes or fire because it is possible for man to spend his whole day on bare ground.
