

Democracy is the best form of government in Pakistan. Democracy gives the power to select your representatives at your own hand. As Pakistan is a country of multi-ethnic groups so democracy is the only way of government which gives them a sense of inclusivity. It was this lack of inclusivity which resulted in the debacle of

East Pakistan (Tadi, East Pakistan debacle). Thus if Pakistan wants to survive in the comity of nations, they would have to hold fast - the rope of democracy.
