Subheading: Negative effects of social media on youth (Distracting from studies)

Topic Sentence	Social media has several negative effects on youth, chief of among which is distracting them from studies.
Reasoning Sentence	The reason is that more than half of the students showed poor academic performance, worldwide, from 2010 to onwards.
Supporting point	The poor academic performance of students forced researchers to work on it. Several researches have been performed to know the influence of social media on academic performance of students.
Example	In different studies, from 2019-2022, US researchers found out that students who are addicted to social networking had significantly lower academic performance as compared to the students who are are not addicted to social networking. They also found out that more than 50% students are addicted to social networking.
Concluding Sentence	So usage of social media has major effect on academic performance of students.
