

Title

Difference of present and past teaching methods.

Precis

Teaching has been changed from just Profession to a large part of Public service.

Any teacher who is inspired by his predecessors, thinks that it is not his duty to teach others about what he thinks but his thinking might be helpful for his students. In past days a

teacher was considered as the man of outstanding knowledge. In ancient time, there was no

one who could prevent the spreading of knowledge from teachers. Any person who wants to be teacher, he would try to

live forever in his book or in history. It is necessary for a teacher to be independent intellectually, so that he ^{can} teach it to his students. In this world, education is given

to everyone and teachers have become civil servant and they are exercised by unexperienced men.

Title

Present teachers and their role as civil servant
