Title: Human Intelligence and Social morality

In current scenario, ^{human} human's intelligence can be used to build social morality in them. It can be done by the career building and to use intelligence for inculcating social values in humans. Historically, social character building was the responsibility of religious institutions, but they failed to achieve this. Resultantly, humans struggled for power and powerful men did not value the principles of societal norms. Men believed, power is everything and this attitude of a man ^{leads} leads towards greater devastation of the society. ^{The} Author ^{hopes that} hopes that it can be reversed with the help of educational ^{institutions} institutions ~~will~~ to induce social morality in human intelligence. Hence, ~~it is a need of hour to find ways to induce social empathy in human's to reduce the further exploitation of the societal norms and values.~~

Idea is ok. Subject verb disagreement. Precis is long.
