Justice is the true and just treatment of individuals, that is free from any bias or discrimination. However, this concept has been misinterpreted and misused to only a few members of society, or to justify ones wrong doing. Therefore, the true image of justice needs to be conveyed to the people, in order to improve their lives. As Theodore Roosevelt once said, "Justice consists not in being neutral between right and wrong, but in finding out the right and upholding it, wherever found, ~~and~~ against the wrong." According to this justice means to stand against wrong and to promote the good deeds, because for a society to remain stable it needs justice to prevail. Additionally, justice can only prevail if the people are willing to embrace <sup>Laws</sup> ~~it~~ because laws are the tools through which justice is achieved. Thus Law making and proper implementation are key to ensuring social stability. ~~Justice In~~ In order to understand why there is a lack of justice within society it is imperative that the social institutions be studied.

Families are the primary institutions that teach children about justice and children tend to practise what they see. Similarly, society nowadays create opportunity for illegal acts, distorts the very concept of justice to empower the strong and undermine the weak.

Politicians have twisted the concept of justice by limiting laws to paper, manipulating the existing laws for their interest. ~~and~~

There is also a lack of meritocracy and discriminatory practices in government institutions.

One of the greatest reasons behind injustice is economics (money). Economic factors are arranged in a way that they empower only a few individuals, denotive women participation in workforce and create income inequality. <sup>lastly,</sup> ~~And~~

~~and~~ education systems do not support moral development, ~~and~~ rather promote unethical behavior due to competition and result-oriented attitude.

¶ The role of justice is ~~the~~ just treatment of individuals based on the rules and laws of a <sup>country</sup> ~~country~~ or organization.

However, nowadays people forgotten the true meaning of justice and follow the definitions

given to them by those in power. Whether it be politics, ~~economic~~ economics, education or otherwise, people have come to accept the reality of "justice of the strong". However, in the current age of information, where people have all the knowledge in the palm of their hands, it has become imperative that all should be able to benefit <sup>from</sup> and receive justice.
