

Polarization: social media and national integration.

OUTLINE

Introduction:

Different types of polarization have been harming Pakistan's national integration for many years ago. However, from past few years, social media has also been being used by polarization to harm Pakistan's national integration.

- A) Conceptualize the terms
- B) Overview of the present different kinds of polarization in Pakistan and how is the use of social media increasing day by day?
- C) How is different kind of polarization harming national integration through social media?

- a) Conflicts among different sects due to their views on social media are destroying national integration
- b) Confrontations among different ethnic groups are rising through social media and are destroying national integration because no ethnic group can bear the dominance of other ethnic group
- c) ~~Rising~~ Rising disagreements among supporters of different political parties through social media are destroying national integration
- d) Social media is increasing conflicts among religious people and secularist people by sharing their views with one another, and is increasing ~~national~~ disintegration
- e) Nationalist versus Globalist confrontations are rising through social media and thus destroying national integration
- f) National integration is being destroyed by social media because it is increasing Traditionalist versus Nationalist conflicts.
- g) Social ~~media~~ media is increasing national disintegration by rising class polarization.

- h) Social media is decreasing national integration by making groups of different norms in a society

i) Social media is enhancing the chances of state division which is ~~end~~ of national dis-integration by rising polarization among people.

s D) How will this delicate situation be controlled?

F.) Conclusion
