The changing apparatus of the globe has created reconciliatory bodies. It is an immutable fact that globalis-----tion has made nations interdepedent. -No nation can survive alone. However, the South Asian Association of Regional Cooperation (SAARC) was formed to enhance trade among the nations of Bouth Asia. Unfortunately, many burdles 1 are causing trouble for the celevity of the institution. South Asia is one of the most unintegrated region in the world. The leading cause is frozen political conflicts because of India's will to dominate the region. In addition, terrorism, water disputes, and no people-to-people contacts are the obstacles that have weathered the SAARC. More over, propects for SAARC depends on its effectiveness, and there is a dire need to make SAARC an effective body for regional peace and harmony. It can be possible P P 9 9 9 9 9 9 white correcting structural flaws, change in functional approach, and egoual distribution of Dower. Therefore, SABRCI Several ills in the region. 	the demarcation of durand line, or	
	the water issue between Nepal	
	and India, the begion has been	
	shrouded with martial series of	-
	events for more than 75 years.	
	These are the main reasons which	
	have initiated political rift between	
T	countries. while international platforms	
	have tried multiple times to solve	770,000
	disputes, they have failed. Unfortunately	
	SAARC became the prey of conflict	
	while ceasing its merits of melting	
	ice between the nations.	
	Terrorism is another obstacle	1
	that has affected SAARC's efficacy.	
	It is the foremost reason that has	1
	enhumed the relationships between the	
	States. Each country accuses another	
	of cross-boarder terrorism in South Asia.	

There are multiple Hers of tenorist outfits, such as on the enternation level 1915, regionally Al-Qaida, nationally TTP and Tamil Tigers! Modeover, these non-state actors are present in South Asia, and neither country is willing to solve the issue of terrorism collectively In addition, SAARC's next session will be held in Palistan. India withdrew from session while blaming Pahistan for prony in Jamus and hashmir. Thus, regional Players are Playing a blame game that has streamlined the SAARC Along with terrorism, water for SAARC. Almost & all south Asian countries are agrarian, and shromishes often happen due to the high water demand. India has a plus point in its geographic location, and it has built many dams on the upper side that have caused Stoppage for lower region. However, as per Indus Water Treaty between India and Patistan, arbitration by world Bank, India got control of the upper raparian Divers, namely suffej, beas, and Ravi, with few restrictions of not

	building high # storage reserviors
	and Nevertheless, India has violated the
	treaty while building dams, namely
-	Kishanganga dam, Patal pul, and
	lowe kalai . In the light
	of water disputes, SAARC has become
	a toothless tiger.
	AND THE RESIDENCE OF THE PARTY
	While SAARC is confinting
	above all impediments, the last is
	Zero people-to-people contact. The

	incompatible, but samplar culture
	has created same product base
	need. However, India and Pakistan
	have had no trade since the
	abrogation of article 3700B
	Jammy and Kashmir in 2019. While
	a sport is a plate form that

, ,	Reople's interaction compels that
	State to work multilaterally;
	however, SAARC has the challenge
	of overcoming the hundle.
	The ingredients for stability,
	Peace, and harmony can be used

worldwide by negotiations, compromises	-
and amendments. After discussing obstruction,	-
a few recommedations are listed	
below to make SHARC an effective	-
body.	
Firstly, there is necessary to	6
correct the institutional structural flaws	
of SAAPC It is only a social	
and economic cooperation forum,	
while Bouth Asia is in the	0.
middle of Security threats, proxywavs,	- 5
and territorial disputes. For enample,	
Pahistan and India ought to refrain	•
from shirmishes and find conevent	•
Solutions on Kashmir. Both	
Countries can normalize relations, while	
fueling the engine of SHARC with	-
peace and stability. It can only be	-
acquired by transforming and	
reforming the institute structure

Organization should change its exptens, allows give targets to experts under the supervisions of politicians, where experts lead the issue—like the European Union (EU). Funationalism independence is present only in water disputes, where the country's bureaucrats interact, but withoutary field euperts. Therefore, governments of member state should come on one page and adopt a neo-functionalism approach. Third, the hegendonic to SAARC's phenomena For emple has a giant economy in the EU: and France has largest military. As a result, there is a balanced
framework, while in SAARC, an imbalance is present. India
has to percent SAARC area; BS percent GDP; the largest army; The percent of population. These factors compel indig to dictate other member stakes. In compatison, multi-lateral forums are formed to work Collaboratively without any hegensonic Voice. So, a balance framework approach is the essence of SAARC's efficacy.

Lastly, on some topics of ASEAN,	
SAARC has similar approach in decision-	
making Process. While ASEAN framework	
is working smoothly, SAARC is	
facing bureaucratic hurdles. For examples	
secretariat work is only to do coordination	6

as per men's power, India is the	
beneficiary. One-State-one-Vote model	•

Scenarios, there is a dire need for	
SHARC to reform its decision-making	-
