

## General English Evaluation.

On the second day of ~~year~~ 2023, I was sitting and wondering what would be my life in 2033. I

**What would I, who would be about 38 years old by then, be doing and where would I be?**

would be. ~~For~~ I might be sitting in some foreign country, representing my country as a foreign officer, or pursuing another dream. **However,** but I would

love the first scenario more as I was striving <sup>hard</sup> to achieve that goal at that time. But then my

thoughts drove <sup>me</sup> to the ~~abstract~~ reality that I might not be alive at that time as life is uncertain.

But that  does not mean that we should not struggle to achieve

our goals. **achieve** Therefore, I promised myself that wherever I would be after ten years, I would strive to achieve my goals and to be a better human being **till** my last breath because that uncertainty is the beauty of ~~life~~ life.
