Unemployment

Unemployment is the major issue of the country. Unemployment start whenever factories go on crisis. Pakistan is facing a lot of crisis but one of them is Unemployment. Few years ago Covid-19 change the world order.

In result many people had lost their job due to pandemic. Millions of Overseas returned back to their countries. Furthermore many industries were closed.

Years ago flood had crashed all the system because daily wages labour couldn't go on work. Office person couldn't able to proceed their jobs.

If we see in social life Unemployment is a poison for a nation because it leads lives to extreme level of survival. Unemployment compels persons to commit crimes.

Government must focus on that kind of issue else it would be dangerous for the law and order situations to prosperity of country. So, government must focus to create millions of jobs for educated persons and setup factories for uneducated persons. However educated person will go to job and uneducated persons will go to factories then Unemployment would be reduced from Pakistan.

Sir/Madam kindly evaluate it Thank you
