5. Way forward to address challenges posed by online education

- a) To improve infrastructure and connectivity issues.

b) Professional development of teachers.

c) Collaboration with students in course making

6. Conclusion.

Essay:

In the age of technological advancement, the world is modernizing the every sector of life, education is one of them. With the advancement of education system the learning techniques has changed from outdated black boards to advanced digital boards.

The modernization of education provides more opportunities than challenges.

The opportunities such as increase in enrolment of children, removes barriers from class-based education system, provides more interactive environment, more convenient and flexible and provide opportunity to manage time.

However, the online education has also its downside. The lack of face to face interaction with teachers and class-mates can lead to feeling of isolation and disconnection, and the self-paced nature of online learning may not suit all the students.

Besides this infrastructure and untrained teachers are creates more challenges.

Additionally, the online education can be

more challenging for students who have lack of motivation and discipline. Therefore to address these challenges remedial measures are need to be addressed.

Before discussing the opportunities and challenges, it is important to know about online education and its significance. Online education refers integration of electronically devices into education system which work through internet. This integration has increased the significance of education across the world. The twenty-first century brought about massive change in world of education. Moreover, covid-19 gave boost to e-learning. This period pushed the world to move online education. However, the more importance was realized with a aim to easily access to education. The significance of e-learning is to bring out of school children into stream and it also removes the barriers of class-based education system. It has potential to uplift the literacy rate and to reduce the poverty across the world. Therefore, education system must be promote equally across the globe.

The online education has provided more opportunities some of
