

# Can AI will replace humans

## Outline

1- Introduction: Thesis statement: Artificial Intelligence has potential to replace humans. In fact, dependency on AI for educational purpose, industrial production, mass media, etc. has tendency to take position of a man. Therefore, AI will soon replace humans.

2- AI: A human unfriend

3- How AI will replace humans?

- a) Student's dependency on AI: Affects student's skills
- b) Use of robotics in industries for higher production will replace labours
- c) Use of chat GPT information in public media will increase scope of AI
- d) Robotics surgery in health care will impact intellectual doctors
- e) AI in driving vehicles has taken human position

4- AI will not replace humans

- a) AI is helpful in <sup>students'</sup> education
- b) ~~Though machines do not get tired~~
- b) Robotics use in industry will increase labour productivity
- c) Chat GPT information is plausible: enhance human attraction
- d) Robotics surgery will help doctors in efficient work

e) AI use in vehicles has helped in traffic management: ensured human safety

5- AI will soon take human position

a) Students' over dependency on AI for education will curtail their creativity

b) Though machines are feelingless: dependency for economy will replace humans.

c) Chat GPT information will lead to chaos: threat to human peace

d) Robotics surgery will replace doctors position in hospitals

e) AI driving cars has replaced human drives
