Disorder

Psychoses, neuroses and mental

Psychoses and neuroses shows man's ability to sustain a level in managing his life. The ego is on the opposite side. In psychoses the ego is completely disintegrated when man wants to achieve some goal and unable to succeed in his goal. Man relapse into achieving this goal which is not acceptable to him and society. The whole psyche relapse man behind the time. Psychoses and neuroses convey the message of self actualization. Neuroses show more strange behavior which may be explained by fellow being in culture. This explanation arises social question about mental disorder. Such behavior is accepted in one culture may be treated unstable in other. Emotional imbalance is vary from place to place.
