

## Preliminary Version Of Constitution:

The path to current government and constitution was very tiresome. The time duration between 1947 to 1958 was full of political chaos. The important task was to form the constitution for the country. The first major step taken was objective resolution in the constituent assembly. The Prime Minister Liaquat Ali Khan introduced objective resolution in the constituent assembly. And this objective resolution provided different principles of democracy for Pakistan. Like freedom, equality, and social justice, etc which is explained by Islam and Shariah. So on the same day a Committee of 24 members was formed for the drafting of the constitution on the basis of the Objective Resolution.
