

Despite its urgency, climate crisis remains the most neglected cause

Outline

1- **Introduction: Thesis Statement:-** Climate crisis is the most neglected cause despite its urgency. Several factors such as population growth, industrialization, burning of waste etc promote climate crisis. Consequently, negative implications affect global life. Therefore, suggestive measures be taken to curtail climate crisis.

2- How climate crisis is the most neglected cause despite its urgency?

3- Factors promoting climate crisis

- a) An abrupt increase population of the world
- b) Rise of global industrialization and trade war
- c) Common burning of house hold waste
- d) Rapid degradation in the world
- e) Urbanization and unsustainable development
- f) Use of non-renewable resources for energy generation

4- **Black image of neglect of climate crisis**

- a) Frequent melting of glaciers
- b) Rising heatwaves and temperature annually
- c) Loss of biodiversity on the earth
- d) Unprecedented floods across globe
- e) Outbreak of diseases
- f) Threat to labour force due to rising climate

crisis

9) Destruction of agriculture and food insecurity

5- Suggestive measures to address climate crisis

- a) Promote plantation and reforestation policy
- b) Use of renewable energy resources for power production
- c) Affective implementation of clean air policy
- d) Paris Climate Agreement COP21-2015 implementation
- e) Global agreements on climate crisis
- f) Public awareness about clean air and clean environment.

6 Conclusion
