

The threat of global warming and the ways to counter it.

Outline

1. Introduction

Thesis Statement: Global warming has become a looming threat for the world. Both natural and human factors are responsible for the prevailing threat of global warming. However, by taking proactive measures the threat of global warming can be countered.

2. How global warming has become a threat.

3. Contributing factors to the threat of global warming:

a. Emission of green house gases

b. Excessive use of fossil fuel

c. Depletion of ozone layer

d. Rapid growth of industries

e. Unbridled population of the world.

f. Increasing rate of deforestation.

4. Prevailing threats of global warming

a. Widespread shifts in weather systems

b. Eruption of wildfires.

c- melting of glaciers at an accelerated rate

d- Rising of the sea level

e- Crops destruction and loss of soil fertility.

f- Direct threat to life.

5- Ways to counter the threat of global warming.

a- Reduction in emission of green house gases.

b- Replacement of fossil fuel with renewable sources

c- Use of modern technology instead of an outdated transportation system.

d- Initiation of mass awareness programme.

e- Initiation of massive forestation.

6- Conclusion
