

Body Paragraph

Pakistan is grappling with many educational problems, but standardised education is the most significant problem. Because standardised education is based on predefined goals and syllabus. It discourage students to critically analyze the topics, think out of the box, ask questions and ^{give} solutions to ^{the} problems. Teachers give instructions to students that learn this lesson by heart and take get high marks in the test. High marks are considered the success of a student which is not a good approach because just a single sheet of paper can not define the success of a student. Pakistan has been adopting this educational system for more than 70 years but it has ^{been} failed to produce students which could compete with international students. Because our standardised educational system promote rotting and memorizing, and discourage logical thinking and creative learning. Therefore,

Standardised educational system has become ~~the~~ a big challenge for ~~the~~ educational system of Pakistan.
