

(24/July/2022) "Body Paragraph"

3) Reasons behind the people's dependency on technology:

- a) Massive uses of robots for domestic activities.
- b) In industrial and agricultural sectors, modern technologies are being used.

The first core reason of the people's dependency on technology is massive usage of robots for domestic activities. Both female and male domestic servant are almost being replaced with robots in western and developed countries. Furthermore, as usage of robot in domestic ~~work~~^{level} elevated, the production of domestic robots also jacked up. According to BBC, robots ~~to vacuum~~ vacuum cleaners have become the most widely produced.

Day by day people are depending overly on ~~tech~~ robots. According to Artificial intelligence experts, people will

People are free from 39 percent of housework till 2033. Hence, high usage of robots for domestic work have made the people overly dependent.

Technology is not only using in domestic level, but modern technology are also being used in industrial and agriculture level of production. Both industrialists and agriculturalists want to gain more and more profit and high profits ~~are~~ come from high production in less time. Modern technology helps them produce at high level in less time. Most of production sectors shifted from labour-intensive to capital intensive. On the one hand, labour are being unemployed. On the other hand, ~~the~~ ~~entire~~ industrialist and agriculturalist are highly dependent on technology. To sum up, using of modern technologies in industrial and agriculture sectors shows

people dependency.
