

(Body Paragraph)

NEGATIVE IMPACTS OF SM ON YOUTH

Social media is flooded with misinformation which negatively shapes opinions of the youth. So far, there is no central authority that could check factually correctness of information available on social websites. Many believe that Capitol Riots in US were a result of series of misinformation spread on social media websites like Twitter and Facebook. Social handles of ex-President of America Donald Trump were suspended recently by policy makers of Twitter and Facebook. As they believe that his social accounts were responsible for sharing misinformation, which eventually lead to Capitol Riots. This clearly shows that social media does play role in shaping mindset negatively, particularly of the youth.
