BATCH: RWP 44 - RAMAL IJAZ

Sub-heading: The negative effects of social media on youth  
(fake news)

Topic Sentence	The negative effects of social media has a broader aspect but when it comes to the fake news element, one mind actually gets puzzled because youth is getting targetted at a higher rate due to the fact that they've more into the new media.
Explanatory or Reasoning sentence	The amount of fake news is rising above the alarming borders which is making it difficult for our young generation to distinguish between a reality and a fabricated truth.
Supporting point	The problem is concerning as many serious health related issues too aren't getting resolved because of the rapid pace with which disinformation is reaching the immature minds.
Example/Evidence	Disinformation along with misinformation and fake news are a serious hurdle in the process of making masses realise the importance of vaccines and their affects on bodies (WHO, Infodemics and misinformation, 2022).
Concluding sentence	Hence, a series of serious actions like open forums with evidence based data, public awareness seminars and making the use of social media productive is necessary as its an efficient tool in not just delivering but ensuring the message conveyed to mass audience is well understood.
