Why Pakistan needs artificial intelligences

In today world, we see a huge and massive rise in the sector of artificial intelligence. Many countries are investing in the AI sector for their militant and national security. The world largest ~~corpora~~ corporation such a "Microsoft" has invested billions of dollar in artificial intelligence sector and technology. This technology provides the access to the "literacy" because through this technology we can interact with different sources and can study online. For Pakistan it is also necessary to invest in this sector, because it is a time for Pakistan to step^{up} in this race. This ~~technology~~ technology is as necessary for Pakistan, as the internet was necessary in 2000. But unfortunately Pakistan has not taken even a such step to invest in this technology. Although it is true that country has created an initiative in the form of ~~Preside~~ presidential initiative for "Artificial intelligence and Computing" (PIAC), but instead of investing in this technology sector, it focus mainly on the education of the youth. In short, for our country to win this global race it is important to
