Threat of AI to cinema Industry.

The rise of AI is a severe threat to growth of cinema industry. The concept of "digital double", a robot that can perform same as the artist do, is in directly confrontation with original performeers. With the progress of AI, actoos may be replaced by generative AI robots. "Majority of the member of Screen-American actoos federation, including A-list actors are leading the strike against the erosion of their rights." Unfortunately, future of cinema artists is highly dependent on the future of AI.

Ukraine : Transition from Europe's Bread basket into military might.

The greatest beneficiary of Ukraine invasion by Russia is Ukraine — once considered as a bread basket of Europe, now tranforms itself into military might fighting against Great Russians. Before Russian invasion, Ukraine was just called "Bread-basket" of World due to its highly cultivated land but after one and a half year of war, Ukraine multiplies its military strength with the help of Western Countries. The Ukrainian forces with help of NATO and western bloc successfuly applied counter-offensive strategy against Russia especially by increasing drone Capabalities. "Drones are very important element of our warfare right now — The warfare of future is the warfare of drones." (Ukrainian Admiral Neizhpapa). Indeed, Ukraine gets more benefits than losses in Ukraine-Russia war.

Warfare of future is the warfare of drones.

The world learned a lesson from Ukraine-Russia war that future's warfare belongs to warfare of drones. The USV's — uncrewed Staff ~~vehicle~~ vessels or "drone boats" play~~ed~~ a significant role in recent conflicts in the Black Sea. The use of drone boats in Ukraine-Russia war are the first time in the history of warfare and have effective impacts on both side about learning new things militarily. "Drones are very important element of our warfare right now — The warfare of future is the warfare of drone." (Ukrainian Admiral Neizhpapa). So, future wars will be fought through drones as a significant element.
