

Topic: Despite its urgency, climate crisis remains the most neglected cause

### Outlines:

#### 1. Introduction

Thesis Statement: Climate crisis is most important and urgent issue, the people are facing right now. This issue need to be solved due to its severe effects on Earth. The remedial action at global and national level are need of its urgency the hour.

#### 2. Causes of negligence on the Climate Crisis despite.

#### 3. Factors indicating the urgency of climate change.

- a) Alarming rise in global temperature
- b) Unusual flooding
- c) Melting of glaciers and thinning of ice
- d) Rise in Sea Level
- e) Ecosystem Disruption

#### 4. Causes in negligence of climate crisis

- a) World leadership focusing on other issue
- b) Developing countries thought it should solved by developed countries
- c) Developing countries do not have enough budget to invest in climate crisis.

d) Prioritizing of national interest over global interest

e) Lack of Public awareness and education

5. How to mitigate this issue

a) Growing more trees and enhancing forestation

b) Use of Renewable Energy Resources

c) Reduction in the emission of  $CO_2$

6. Conclusion

Essay

"The climate crisis is the greatest challenge humanity has ever faced. It is a crisis of our own making, and it is up to us to solve it." These resounding words from Al Gore encapsulate the immense urgency of our current situation.

The consequences of our actions, driven by unsustainable practices and heedless exploitation, have brought us to the brink. The time for complacency has long passed; it is now a matter of survival for ourselves and the generations to come. There are many factors that indicating the urgency of this issue such as rise in global temperature and melting of glaciers. Urban flooding is

another factor casting threat to Earth. Similarly, rise in sea level is issue need to mitigate. The ecosystem disruption due to which other issues are taking birth, is a severe threat. But, still this issue is not gaining any attention from world. Leadership of developed countries are busy with other stuff and developing countries does not have budget for it. Moreover, prioritizing national interest and lack of awareness are the causes of negligence. In conclusion, Climate crisis is most important and urgent issue the people are facing right now, but still it is most neglected. This issue need to be solved due to its severe impacts on Earth. The remedial action at global and national level are need of the hour.

Climate crisis is a crisis we face today due to changing in weather pattern. The main reason behind this crisis is man-made activities, which are causing an increase in global warming. Scorching summers are the reason of melting glaciers.

and the rise in sea level. The industrialization revolution, has played a substantial role in exacerbating the climate crisis. The rapid advancement of industrialization led to increased energy consumption, extensive deforestation, and a surge in greenhouse gas emission. The industrialization revolution's impact on the climate crisis serves as a stark reminder of the urgent need to transition to sustainable practices and mitigate the harmful effects of human activities on our planet.
