Disorder.

Psychoses, neuroses and mental

Psychoses and neuroses <sup>show</sup> man's ability to sustain a level in managing his

life. The ego is on the opposite side. <sup>completely</sup> In psychoses, the ego is <sup>disintegrated</sup> completely disintegrated when man wants to achieve

some <sup>succeed</sup> goal and <sup>is</sup> unable to succeed <sup>in</sup> this goal. Man relapse into achieving this goal which is not acceptable to him and

society. The whole psyche relapse man behind the time.

Psychoses and neuroses convey the message of self actualization. Neuroses show more strange behavior which may be explained by fellow being in culture. This explanation

<sup>raises</sup> social question about mental disorder. Such behavior is accepted in one culture may be treated unstable in other. Emotional imbalance is vary from place to place.
