Despite its urgency, climate crisis remains the most neglected cause. *discuss impacts to prove urgency*

Outline

1- Introduction: Thesis statement:- Climate crisis is the most neglected cause despite its urgency. Factors such as growing population, industrialization, deforestation etc. *exacerbate* climate crisis. Consequently, neglect of climate crisis affect human survival. Therefore, suggestive measures *must* be adopted *immediately* to curtail climate crisis. *redundant*

2- Climate crisis - the most neglected cause?

3- Factors leading to climate crisis

- a) An abrupt increase in population of the world
  - b) Rise of global industrialization
  - c) Common burning of household waste
  - d) Long prevailing deforestation in the world
  - e) Rapid growth of urbanization
  - f) Dependency on non-renewable resources for energy generation
- redundant*

4- Bleak image of neglect of climate crisis

- a) *Frequent* fast melting of glaciers
  - b) *Rising* heatwaves and temperature *rising* annually
  - c) Threat to labour force outside *only them?*
  - d) Unprecedented floods in Pakistan *topic is not limited to Pak*
  - e) Outbreak of plagues & diseases
  - f) ~~loss of~~ tourism industry
- Adverse impacts on*

- 5- Suggestive measure to address climate crisis
- a) Focus on forestation and reforestation globally
  - b) Use of renewable energy resources
  - c) Implementation of National Clean Air Policy
  - d) Operational implementation of Paris Agreement
  - e) Global multilateral binding agreement on climate crisis

6- Conclusion

Out line is not comprehensive.
