

~~Maisha~~ Title:

Online Education Benefited greatly From Covid-19

Outline:

1) Introduction

Thesis Statement:

topic is how online edu
benefitted or became
prevalent after covid19

One can not refuse
that online education became
more beneficial during covid-19.
Because it proved to be
an alternative source versus
transformational education that was
greatly affected by pandemic.

2) How Online education ^{benefitted} was
from ~~encouraged~~ during pandemic.

a) Students rushed towards
online education → why?

3) Covid-19 proved online
education ~~learning~~ an opportunity → how
for more learning.

points in outline should be self explanatory

read about the topic before writing for data, the outline contains similar points in different words

- a) people started learning earning through online education due to pandemic → clarify
- 4) Educational institutions spread ~~ed~~ online education on account of covid-19 pandemic.
- 5) Conclusion ✓

Essay

One can not refuse St that online education became ^{end of} more beneficial during covid-19. ^{intro} Because it proved to be an ^{para} alternative source of education verses ^{intro} transubstition education which was ^{para} greatly affected by pandemic. Since covid-19 severely affected every aspect of life including social, economic and educational sectors. Among them, education was badly paralyzed, because thousands of schools, colleges and

universities were closed to save the lives of students from the feared disease. For example, ~~major~~ ^{all} universities of Pakistan such as, ~~Quaid-e-Azam~~ ^{sp: spelling mistake} university Islamabad, Islamic International university Islamabad, University of Balochistan etc were closed. So continuing Teaching and Learning process, online education was justly promoted to fulfill the needs of education which benefited a lot during pandemic.

Online education was encouraged during pandemic covid-19, because it was the only way to save the students lives from pandemic. Every state and country started different programmes and platforms to provide education at homes through online system. That's why student rushed towards online education. For instance,

BYJU'S started offering free access to their services which resulted 200% increase of students, according to "market insight" the company's chief operating officer. Besides, Tencent classroom has been used extremely since mid-february 2020, after the chinese government instructed a quarter of billion full time students to resume their studies through online platform. This resulted in the largest "online movement" in the history of education with approximately 730,000, or 81% of K-12 students, attending classes via the Tencent K-12 online school in Wuhan. As a result online education was promoted during covid-19.

In addition, covid-19 provided many opportunities of learning different skills and knowledges for students.

Not included in outline

One ^{could} ~~can~~ get more at ^{their} ~~his~~ door steps. Because students ~~can~~ ^{could}

take admission in different courses at the same time.

Such as formal education, informal education, professional education and other different skills. People

also started earning through online platforms, such as daraz app, zara app, Ali baba platform, Amazon and utube etc. According to a report

issued by Payscale, a global payment platform, Pakistan has ranked as the 8th fastest growing freelancing economy in the world, with a growth of 69 percent (report published 7-march

2023). This proves that along with online education, online earning was also benefited during covid-19

more over, educational institutions started spreading online

education system in every part of the world. These institutions brought a change in their fee structure to motivate students for online education. For example, in Pakistan, The National Officers Academy started online batches for PCS, PMS and CSS preparation, lessening its fee from one lack (100000) to fifty thousand rupees with a special discount. Besides NOA, small academies like NIPS Quetta, KIPS and Civil Academy also benefited students through online system of education. Therefore a large number of poor and needy students were benefited and profited a lot by online education during pandemic covid-19.

To conclude, one may say that covid-19 pandemic was a great

challenge for human beings. As it paralyzed every each and part of life, thousands of people were died, hundreds of people lost their jobs, but at the same time it also promoted and benefited online concept of education. Majority of students completed their goals through online education. Majority of people earned a passive income through online earning. But there were some problems linked with online education such as network issue and provision of digital devices such as mobile phones and laptops. If those problems were removed more people will be benefited from online education, to achieving a bright future.
