"Despite its urgency climate crisis remains the most neglected cause"

Thesis Statement

redundant

Outline

1) Introduction:

(Despite its urgency climate crisis remains the most neglected cause)

This is because at global, national and individual level the issue is not prioritized and highlighted as much as it could be

When all these stakeholders will start to work at all levels, then the grave issue of the world can be put into spotlight and will be eventually addressed. (~~Thesis statement~~)

(2) <sup>The</sup> How climate crisis is most neglected cause.

(3) ~~Being serious issue~~, the climate crisis is neglected due to following reasons:

(a) ~~Deadlock~~ to address the issue due to environment politics.

(b) Expensive transition from non-renewable energy to renewable energy

(c) <sup>The lack</sup> of INGO authority and infrastructure

State significance of climate crisis cause generally in neglected

### Introduction:

Today world is facing many severe problems which are lethal for ~~our~~ globe. However, Climate crisis is on top among global problems. Although it's the most pressing issue of the world, yet it is most neglected cause. Scientists and activists are ringing alarms about <sup>the</sup> gravity of the issue. But global politics on environment, crippling economy of the world, inadequate infrastructure to transform world from non-renewable to renewable energy, public myths regarding climate crisis, complex nature of issue itself, and weak global governance ~~are~~ hindering the practical <sup>measures</sup> activities to address the issue. As a result, climate crisis is looming around the world. This will create ~~enduring~~ effects which will engulf the prosperity of the earth. ~~The effects are~~ increased induced migration, erosion of biodiversity, speedy melting of ice from glaciers and more frequent natural disasters. These ~~disasters~~ <sup>effects</sup> can be avoided by many solutions. The solutions are

the development of political will of big powers to pay attention to global threat, Reparations from carbon emitters, public awareness campaigns at global level to break the myths, and plenty of research work can bring global concern into mainstream problem list and top priority. Despite its urgency the climate cause remains the most neglected causes because at global, national, individual level the issue is not prioritized and highlighted as much as it could. When all the stakeholders will start to work at all level, then the grave issue of the world can be put into spotlight and will be eventually addressed.

### Conclusion

From the above discussion it can be concluded that Climate crisis is the most alarming issue of the planet earth in 21st century. But this crisis remains the most neglected. <sup>me</sup> The reasons are environmental politics of big powers, insufficient funds to transform the <sup>non-</sup>renewable energy infrastructure into renewable energy infrastructure, public unawareness regarding the gravity of issue, itself complex nature of climate crisis. This long neglected cause has adversely affected the globe. Now the planet earth is prone to many violent implications; such as induced migration, faster eroding biodiversity, more frequent natural disasters, sudden rise of new diseases from melting ice from glaciers and so on. As ~~this~~ long as this issue is left unaddressed and away from discussion, the implications would be more severe. The world will face unbearable challenges. So there is <sup>an</sup> urgent need to pay attention to this issue and this is possible by many ways. The solutions can be development of political will of big powers to address

Date: \_\_\_\_\_

the climate crisis, Reparations from carbon emitters, Public awareness campaign to educate people regarding the seriousness of the issue, giving legitimacy to INGO? for policy making and implementation of policies for climate crisis. By doing all these steps we can put the neglected climate crisis into mainstream politics and study. Hopefully one day the world will overpower the climate crisis.
