These points are generic ✓

1-1-20

Singapore has hardly with any natural resources, yet it Singapore has exports of around some \$400 million annually today, while Pakistan's exports stand at about \$32 million. Singapore government recognizes that a well-educated workforce is essential for economic growth, and invests heavily in education - about 2.0 percent of its annual budget. The country's education system is highly centralized and with ^{spelling mistake} has rigorous curriculum. Education is an indispensable element of the progress of any nation. The nations that ^{realised} ~~realised~~ and worked in education sector, enjoying progress and stability in the society. However, education system of Pakistan has failed to produce efficient human resources. Poor economic growth, unemployment explosion, political instability and polarization, absence of technological advancement in education and religious extremism are the evidences of failed education.

The roots of The dismal

system. Education system of Pakistan has ~~failed~~ ^{situation} to produce ^{lie in} sufficient human resource ~~owing~~ to some basic reasons like, irrelevant curriculum of education, poor infrastructure, acute shortage of skilled faculty, gender inequality and less number of technical institutions. However, some effective steps if government takes like, sustainable education policies, establishment of technical institutions, biometric attendance of teachers, Ensure quality education and free education of poor children. Pakistan has the sufficient resources and youth bulge to produce effective human resources through education system.
