Essay Topic: Human invention
move the societies backward

Paragraph Topic: Rapid expansion of
industrialization led to environmental
degradation of human society

Human inventions ⁱⁿ on industrialization
have certainly had a profound ~~profound~~ ^{devastating}
impact on the environment of
human society. The modern machinery
used in industrial processes ^{is} powered
by fossil fuels such as coal,
oil and gas. These fossil fuels
emit ~~the~~ ^a large amount of
greenhouse gases ^(GHGs) into the
atmosphere. ^{Due to these GHGs,} societies face various
environmental problems including
water and air pollution, climate
change, deforestation, and habitat
destruction. The boreal? forests, found
in the northern regions of North
America, Europe, and Asia, face
deforestation because of industrial

Elaborate how these affect human society directly

Date: _____

activities. The trees of this forest are used for timber and pulp production. As a result, the societies ^{have} lost vast areas of forest cover. In this way, the ^{have} intervention of human in industries led to environmental degradation that propel the societies backward.

write legibly
