Mashaal

3. ~~Letting~~ enhancing intellectual ability is neglected in Pakistan's education system

Students are exammer not practical which lead to non-intellectual cramming is preferred to conceptual learning.

~~profes~~ The students in Pakistan's education system are ~~exammer~~ ~~ing~~ which ~~lead to non-intellectual abilities~~ ~~ies~~ ~~does not enhance their~~

The reason is that, they ~~are~~ just want to get marks and keep themselves limited only with curriculum. In fact, the faulty examination system is responsible for non-intellectual ability. Considering that, the examination system sets the questions, which test the memory instead of their ~~intelligency~~ ~~of students~~ ~~intelligency~~ This method of testing is inadequate because if an average student successfully exams up a few important questions, ~~they~~ ~~he~~ achieve higher results. Many good students do not perform well because they fail to cram ~~up~~ ~~from~~ the academic books. Andeed, the education sector ~~is~~ ~~has~~ failed to test the strength of the students. (Hassan Akbar, Faulty education system, 6 Nov, 2021). In short, to eradicate the flaws in Pakistan's education system, it can be improved as a result, ^{of which} the intellectual students will come to the society.

3. Why enhancing intellectual ability is neglected in Pakistan's education system

d. ~~lack of~~ education budget

Insufficient

The lack of education budget creates non-intellectual students in Pakistan's education system. This ~~policy~~ ^{sector} seems to be ~~the~~ ^{receive} less ~~priority~~ ^{focus} from the government. In fact, the low allocation of education budget makes the infrastructure inadequate. Similarly, these ~~poor~~ infrastructure is responsible ~~for~~ ^{mental} low ~~grooming~~ ^{mentally}. Moreover, teachers and students in a large number of schools across Punjab have been waiting for science laboratories for over a year. Approximately, the Punjab government has given high school status to 1,227 middle schools in 36 districts. However, no teachers have been recruited in schools, neither have classrooms, laboratories and computer labs ^{been} set up. (Amir Mehmood, 1,227 schools in province lack science laboratories, 6 July, 2021). In short, to ^{enhance} ~~improve~~ the education budget Pakistan's education system can be improved, resultantly, which ~~can~~ create intellectual minds.

year?
since when?
