Why Pakistan needs artifical intelligences

In ~~today~~ *the contemporary* world, we see a huge ~~and~~ massive rise in the sector of artifical intelligence. Many countries are investing in the AI sector for their militant and national security. The world's largest ~~other~~ corporation such a "Microsoft" has invested billions of dollar in artifical intelligence sector ~~and technology~~. This ~~technology~~ provides the access to the "literacy" ? because through this technology we can interacts with? different sources and can study online. For Pakistan it is also necessary to invert in this sector, because it is high time for Pakistan to step up in this race. This ~~technology~~ technology is as necessary for Pakistan, as the internet was necessary in 2000. But unfortunately Pakistan has not taken even a such step to invest in this technology. Although it is true that country has created an initiative in the form of ~~Presedie~~ presidential Initiative for Artifical intelligence and Computing" (PIAIC), but instead of investing in this technology sector, its focuses mainly on the education of the youth. In short, for our country to with this global race it is important to

[margin note: the contemporary]
[margin note: for militant what???]
[margin note: pakistan has already check your facts]

Date:

make strategic policies and take
initiative for. Without such policies
and initiative step Pakistan would
remain beyond behind globe.

basics are weak
basic grammar and sentence structure is poor
write complete sentences and complete in meaning
