

Q: Explain the increasing influence of BRICS.

1-

INTRODUCTION

In the dynamic landscape of global affairs, the rise of BRICS—Brazil, Russia, India, China, and South Africa—has been nothing short of remarkable. The group of emerging economies, united by common goals and aspirations, has been steadily gaining ground, turning the tide of traditional power dynamics and asserting its presence on the world stage. As the winds of change blow, BRICS nations have woven a tapestry of cooperation, leveraging their collective strength to challenge established norms and herald a new era of influence. The increasing synergy among these countries has brought forth fresh perspectives and initiatives, breathing life into the once-nascent alliance. As we delve deeper into the ~~scope~~ multi-faceted facets of their growth, it becomes evident that BRICS has become a force to be reckoned with, propelling the global discourse and even the changing and shaping the course of tomorrow.

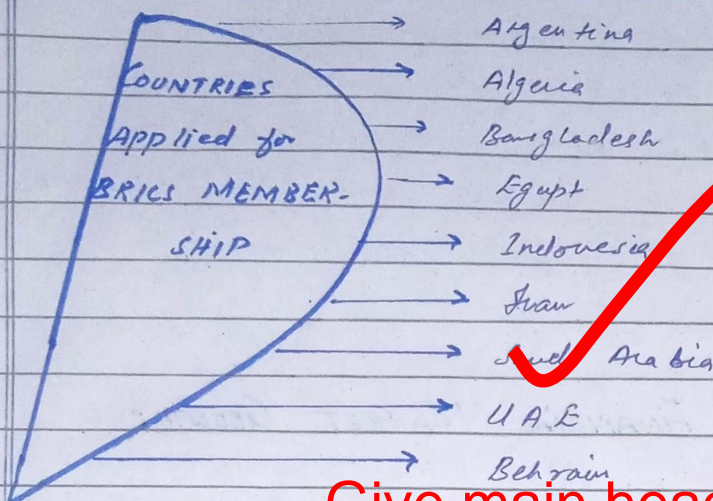

2- HISTORICAL SYNOPSIS OF BRICS

The term 'BRIC' coined by Jim O'Neill, initially referred to Brazil, Russia, India, and China as emerging economies in the global economic order. However, its significance of political-diplomatic entity reach beyond its financial market origin. The four countries started informal diplomatic cooperation in 2006, the first of its ever formal summit in 2009 aimed at global economic improvement and even collaboration among developing countries. In 2010, the inclusion of South Africa expanded it to BRICS. The population of the group is almost

40% of the global and contributing almost 32% global GDP, along with 16% of the world's trade and even larger share of the world's GDP than the G7. Many countries even applied for its membership, which will boost its GDP ratio and swell its population with respect to world.
