merge of Mali after receiving IMF bailouts

b). Each new government of Pakistan is

unable to run its wheels owing to be permanent client of the IMF

5- Modus operandi to turn the IMF bailouts into the road to stability

a)- Repossessing the policies of The IMF

Same as
b point

Clarify

generic

with above points as evidence

as per the capabilities of loan-seeking states

- b)- Making the IMF bound to provide economic liberation
- c)- Discouraging the neo-colonial approach of the IMF
- d)- Promoting macro-economy instead of tax-adjustment policy of the IMF

6- Conclusion

Read about
IMF, its Structural
and financial policies
and make
a better
outlook.

In the history of IMF bailouts, no country, except Turkiye, has become self-reliant after seeking the bailout package. It reveals that the IMF bailouts are recipes for disaster. The objective of establishment of the International Monetary Fund (IMF) is to provide financial assistance to the states. However, the policies of the IMF are falling short from the perspective of bailouts. The IMF bailouts are working as tool of ^{neo-}imperialism and exploitation of loan-seeking states. Moreover, they are serving to elite class by encouraging capitalism and discouraging human development sector. Similarly, the false hope of IMF bailouts divert the focus of loan-seeking states from macro-economy to micro-economy. Apart from it, they also hamper economic growth of the states under the umbrella of structural adjustment of the IMF. Therefore, they reduce the breathing space of loan-seeking states.

To turn IMF bailouts a road to stability, the IMF needs to ensure policy of economic liberalization, and adopt different

lenses for developing and under-developing states. In short, the IMF bailouts are recipes for disaster because they make the states permanent dependent on external loans.

To conclude, the IMF bailouts are pushing the loan-seeking states into the quagmire of debt-trap permanently. They are giving birth to looming shadow of threat to sovereignty of loan-seeking states. In the same vein, they also score to elite class of loan-seeking states because they are unable to be blessing for the poor citizens. The reason is that they hamper human development sector, increase burden of tax and inflation in the states. Though the IMF is brainchild of democratic states, it is undemocratic in nature. The famous Portuguese writer, Jose Saramago, also says:

"The world is governed by non-democratic institution: the IMF, World Bank and World Trade Organization?" It reveals that they are promoting undemocratic values among the states in the form of supporting to the selected leadership of any country because they provide bailout packages, even to dictators and monarchs. In contrast, the IMF bailouts can be turned into road to stability by re-structuring the policies of IMF to serve the layman instead of elites. In this way, the bailout package can prove to be blessing for the loan-seeking states.
