

~~Marhal~~

Body Paragraph

Pakistan is grappling with many educational problems, but standardised education is

the most significant ^{one} ~~problem~~. Because

standardised education is based on predefined goals and syllabus. It discourages

students ~~from~~ ^{to} critically analyze the topics, think out of the box, ask questions and ^{give} solutions to ^{the} problems.

Teachers give instructions to students that: learn ~~this~~ ^{the} lesson by heart and take get high marks in the test. High marks are considered the success of

a student which is not a good ^{sp: spelling mistake} ~~approach~~ because just a single sheet of paper can not define the success of a student. Pakistan ~~has been~~ ^{ed} adopting

this educational system ~~for~~ ^{of} more than 70 years but it has ~~been~~ failed to produce students which could compete with international students.

Because our standardised educational system promotes rotting and memorizing, and discourages logical thinking and creative learning. Therefore,

in the beginning standardiz ed education has been defined correctly but in the rest of para the term has been explained in the light of 'substa ndard education al system'

standardised educational system ^{is} has
~~become~~ ~~the~~ a big challenge for ~~the~~ educational
system of Pakistan.
