- d) By adopting measures to control population.

6) Conclusion

Introduction

In 622CE, Prophet (P.B.U.H) migrated to Madinah and forge a bond of brotherhood among different tribes that were involved in bloodshed of each other. Prophet envisioned that prosperity could be achieved by eradicating obsolete practices of the tribes. Main purpose to established Madina as a welfare state was inclusive prosperity where everyone could be stakeholder in the prosperity of society. Ultimately, success of this unity can be seen in the conquest of Makkah. Contemporary world is like a pre-Madina society where bourgeoisie states and people focus on their interests rather than prioritizing collective prosperity. Anarchy in the world and Capitalist system favors the elite class of developing and developed states leaving the other classes as relegated and marginalized groups. World is globalized and without participation in the international system, states and individuals can't survive. This system exploits them and results into acute poverty. They don't have funds to promote quality education. Further, poor educational standards produce non-skilled human resource. Such people are unable to perform in the development and the prosperity of society. In addition to this, population explosion anywhere overburdens and causes plummet of resources eventually leads to poverty. Lack of inclusive policies

for women participation also hinders global prosperity. ^{Further} Inefficiency of stakeholder to bring economic stability eventually results in poverty. Poverty anywhere is threat to prosperity everywhere. It is not confined to one region rather it diffuses like a virus that threatens the whole system. Shared goal of prosperity is thwarted due to it. For example, it results in illegal means to earn money, criminal activities and terrorism. Likewise, it is detrimental to fundamental rights and social development. It also increases migration influx to the developed countries. Health problems ^{also} arises ~~and~~ which ~~also~~ spreads to other regions. Not only this, poverty ^{results in} also gender gap in societies. All these issues results into psychological problems leading a way that hampers progression. Thus poverty anywhere poses a significant threat to global prosperity. It impedes social, economic and political prosperity. However, this menace can be ~~treated~~ ^{addressed} by reforming the economic system, prioritizing sustainable goal of eradicating poverty, ensuring quality education and adopting measures to control population.

Topic: Population Explosion in Pakistan

1) Introduction
