

(Updated outline after first evaluation)

INNOVATIONS ARE NEVER-ENDING HEADWAYS:OUTLINE:

1. Introduction:

Thesis statement: Human's urge to progress in their lives and surroundings is a never-ending cycle. Whenever man achieves a goal, he strives for something bigger than that, this continuous struggle to reach unattainable perfection makes him revolve in a loop. The evolution of man's personal, professional, political, economic, societal and geographical developments are still in progress and no one knows when they will reach excellence.

2. Man's struggle to innovate is a never-ending struggle.

3. Unending urge of individual for innovation in his life:

- Capacity of man to innovate personal life expands with every achievement.
- Every success in professional life strengthens his desire for more advancement.
- Never-ending desire of man to innovate their social structure.
- Need to provide unchecked developmental resources for future generations.

4. Never-ending developments in the polity of a society.

- Fallacy of political structure demands more innovations for sustenance of world i.e. monarchies, authoritarian regimes and democracy.
- Unchanged conditions of impoverished communities lead to evolution of economic structure (communism, capitalism, socialism).
- Governing policies to curb ~~so~~ ~~modern~~ social issues need to be updated according to modern needs.
- Progression of human rights and equality demands innovation in legal punishments.

5. Technical innovations are never-ending achievements.

- Innovations of war weapon (sword, gun powder, nuclear, AI weapons)
- Revolution of artificial intelligence day by day.
- Transformation of communication between man (use of birds, to online websites).
- Shift of print media to social media.
- Unending updates of electronics in aerospace missions.
- Advancement to digitalized administration.
- Inclusion of technology in education with the time.
- Revolution of geo-sensing techniques (chasing foot ~~to~~ steps to GPS tracking).

6. Conclusion.
