Changing Global Regional Security Dimension

Sub heading: Security Situation IN
South Asia:

The security situation in south Asia is very alarming. This region has the conflict of China-India and Pakistan and India. Pakistan and India has the unresolved conflict of Kashmir. China and India has the conflict of border since 2020. These conflicts make the security more complex. These countries possess nuclear power. "It is the only region where three contiguous ^{nuclear} powers share physical borders with alarmingly low warning time between them." (CJSCS Gen Sahir, 20th Security Summit the Shangri-La Dialogue, Jun, 2 - 2023)

Although these countries handled their nuclear power with care but no one can give guarantee about the future.
