

## Sub-Heading: Political instability in Pakistan

✦

Political instability has been a recurring challenge for Pakistan, hindering growth and development. The country has seen frequent change in governments, military interventions in politics, and a volatile political landscape. Due to the political instability the country has suffered greatly in economy. For example, according to the State Bank of Pakistan (SBP), the country's Gross Domestic Product (GDP) has declined from 6.1-percent for FY(2021-22) to 0.3-percent for FY(2022-23). This significant decline in GDP is mainly due to devastating floods and removal of Prime Minister. Hence, the plunging economy of Pakistan is evident through the political instability.
