

Artificial Intelligence Phobia
is based on lack of knowledge.

Outline

1 Introduction

Thesis Statement: Artificial Intelligence refers to the simulation of human intelligence in machines that are programmed to think and act like humans. Artificial intelligence has seen a wide range of applications throughout the years, including healthcare, robotics, e-commerce and even finance/daily routine life. Concerted efforts ~~to~~ to reduce the fear of Artificial Intelligence.

2 Understanding ~~about~~ Artificial Intelligence:

(a) Role of Artificial Intelligence.

3 Artificial Intelligence Phobia is a threat to humanity.

- Job loss problem
- Safety problem
- Trust Related problem
- Computation problem

4 Challenges of Artificial Intelligence:

- AI and climate change
- AI and social media
- AI and Big Data
- Data privacy and security

5 IS the lack of knowledge the reason for the fear of AI.

~~Knowledge frees us from all fear and makes us strong.~~

a) In history, knowledge has always prevailed over fear.

b) Knowledge frees us from all fear and makes us strong.

6 way forward to reduce the phobia of Artificial Intelligence:

- a) Learn more about AI
- b) Young people take part in it and do experiment more.
- c)

7 conclusion:
