a) Recorded lectures help students to write down missing notes from class

b) Taking online classes on time also make students disciplined

c) A room can be dedicated for taking online classes that matches class environment

d) Majority of people have access to internet

e) Through video call teachers can also interact with students

6) Conclusion

Online education, can serve two goals. For students lucky enough to have ^{access to} great teachers, Online learning can mean even better outcomes at the same or lower cost. And for the millions, online learning can open doors that would otherwise remain closed" (Daphne Koller). Due to technological advancement, online learning is giving a tough time to traditional classroom instructions. However, after covid-19, online learning has become more convenient, prominent and efficient. Traditional classroom instructions are still very significant, but online learning has proven to be more efficient and convenient to traditional classroom instructions. Online learning can be more convenient and efficient as in online learning, lectures can be recorded, online learning saves time and expense and classes can be taken from anywhere. Similarly, online learning is available to anyone who has access to internet and in online learning students can select teachers and courses according to their own preference. However, online learning is not for everyone, traditional classroom is as there is no need to record lectures as students can get notes in class, not everyone has access to internet and in

traditional classrooms there is more interaction between students and teachers. Still online learning has proven to be more effective and convenient as recorded lectures helps students to write down missing notes from class. Video calls in online learning also helps teachers to interact with their student and taking online classes on time also makes students disciplined.

Traditional class room instructions have existed since the start of classrooms. In a traditional class there is a teacher and a group of students. The teachers teaches student in a (class) learning environment, where as online learning refers to learning with the help of the internet. Online learning can be done with the help of a laptop, mobile phone etc. Online learning started a long time before the covid-19 but it gained more popularity during it. However, whether it is a traditional class room instruction or online learning, they both are effective for learning and both play a significant role in their domain.
