# Artificial Intelligence a Collective Suicide.

1) Introduction

2) How A.I is a Collective Welfare.

i) AI is enhancing efficiency and productivity.

ii) Advancing healthcare and medicine

iii) Transforming transportation and mobility.

iv) Empowering education and learning.

3) Factors which are indicating towards collective suicide.

i) Jobs reduced by AI. (freelancing)

ii) Existential threats posed by A.I

iii) Autonomous weapons and warfare

iv) Misuse ~~and~~ of A.I in cybercrimes.

#### 4) Suggestions to mitigate possible threats.

i) Ensuring that AI is programmed to be ethical and safe.

ii) Promoting AI literacy and understanding for job ~~ad~~ adjustments.

iii) Building international cooperation to avoid AI warfare.

iv) Ensuring transparency and accountability in A.I algorithms.

#### i) Conclusion.

Artificial intelligence, known as AI, is one of the most rapidly advancing fields in the realm of technology. ~~The~~ As the world becomes digitized, the potential of AI to revolutionize the way we live, work and interact with each other is becoming more apparent than

ever before. Considering the positive aspects of AI, it is for sure a collective welfare, However, there is an ongoing debate about the potential risks of associated with AI which may lead towards ~~so~~ collective suicide, although if properly managed these risks could be mitigated. Artificial intelligence ~~is~~ is enhancing the efficiency and productivity. Moreover, it ~~has~~ is advancing the healthcare and medicine. In addition it is transforming transportation and mobility. Empowering education and learning techniques is another positive side of AI.

On the other hand, AI has taken over jobs of many freelancers and programmers. ~~There are possible chances that AI may take over whole human society. which pose~~ existential threats are being posed by artificial intelligence. ~~Cyber crimes have increased~~ there is an increase in cyber crimes since the development of artificial

intelligence. These possible threats can be mitigated if properly managed. ~~is done~~. Firstly, ensure that AI is programmed ~~to be~~ ethical and safe. Secondly, ensure the transparency and <sup>the</sup> accountability in AI algorithms. Thirdly, promote AI literacy and understanding. There should also be focus on building international co-operation to avoid any major warfare. ~~However,~~ ~~that~~ Everything has two sides, - positive and negative. If proper management is not done in time, it can become harmful, same is the case with Artificial intelligence. Thus, AI is a collective welfare, but if not properly managed, it can turn into collective suicide.

# MEN AND WOMEN ARE Differently COMPETENT.

## 1. Introduction.

"Men and women exhibit competence differently in different fields of life which have negative impacts on society and in order to maintain balance some remedial measures are required."

## 2. How men and women are differently competent.

2.1 In physical strength both men and women are differently competent.

(Men = Sports, Women = delivery Pain)

2.2 In cognitive abilities men and women are differently competent.

(Men = Maths, Women = arts)

2.3 In communication skills and teaching both men and women exhibit excellence differently.

2.4 Both men and women are

2.4 In leadership skills both men and women are competent differently.

(Men = decision making, women = Problem solving).

2.5 Societal influence also shape the competence of men and women differently (men: Bread winner, Women: Nurturing).

3. There are negative impacts due to imbalance of competence b/w men and women.

3.1 Give rise to male dominated society

3.2 Gender based violence has deepen roots in the society.

3.3 Issues of complexity have increased in females.

3.4 Personal achievements are disregarded on basis of gender.

4. Red Remedial measures to maintain balance in society.

4.1 Increasing more education facilities for both genders.

4.2 Creating awareness in society for the <sup>Basic</sup> rights of both sexes.

4.3 Increasing economic opportunities for both genders.

4.4 Promoting individuals having competence regardless of their gender.  
(Scholarship programs.)

5. Conclusion.

Every living organism which reproduces came to this world as couples. So as, Adam and Eve, the first human couple on this Earth. It is necessary to be in couples to continue this human race. Both men and women exhibit competence differently in different fields of life which have negative impacts on society and in order to maintain the balance of society certain remedial measures are required. Men and women are differently competent in physical strength and cognitive abilities. Similarly, in communication skills and teaching skills both have different approach and are competent in their ways. Leadership skills of both men and women are productive but different in nature. Men are good at aggressive decision making and women at problem solving. Moreover, societal influence also shape the competence of both genders differently. Due to the imbalance of competence between men and women has impacted negatively on society. Such as, gave rise to male dominated society, and Gender based violence, and furthermore, personal achievements of individuals

Date: \_\_\_\_\_

are discarded on the basis of gender. In order to maintain the balance in society, certain remedial measures are necessary. <sup>Firstly,</sup> Improving education facilities for men and women. <sup>Secondly,</sup> Creating awareness on basic rights of both sexes. <sup>Thirdly,</sup> increasing economic opportunities for women and finally promoting individuals having competence regardless of their gender. A fish is good at swimming and a rabbit in running, if a fish is expected to run, it would fail. Similarly both men and women have different qualities at which they are at their best. If both are measured with the same yard stick both would fail. ~~and the result~~ Hence failed society would be the result.
