## WOMEN EMPOWERMENT

Women empowerment refers to making women capable of making their own decisions. Women empowerment is a key to tackle gender inequality, as women have suffered a lot through the hands of man. It is a valuable tool for developing countries for the reason that majority of women here lack legal rights and basic necessities of life as compared to the men. Significant NGOs are working together with developing nation's governments to encourage the women's empowerment. The NGOs are facilitating them with free education as it is one of the best remedies which would make women socially and economically independent. All Pakistan Private Schools Federation is playing an important role by supporting the education of girls students across the country (Empowering girls through education in Pakistan, Ommara Raza, 2021). The old proverb concludes the whole discussion that "if you educate a man you educate an individual, but if you educate a woman you educate a nation".
