The Gender gap as one of the oldest challenges

The gender gap is one of the oldest challenges and a daunting task and it has become a raising concern for the globe to bridge it. Despite a modest improvement, women from all around the world are being victim of gender disparity. On average, the basic cause of the gender-gap is low income of women. They choose less-paid jobs for themselves, either by choice or by social expectations. In 2023 WEF global gender gap report, the percentage of gender gap is 68.4%. It has been found that at this rate of progress, it will take 169 years for the world to reach economic parity, and 163 years to reach political parity. Thus, the gender gap is not a new challenge that women suffers throughout the world.
