Q: Would Pakistan be able to maintain balance between the USA & China. Given world politics in view, what would be the strategy of Pakistan?

The two countries United States of America and China have been in the a good long term relationship with Pakistan. Pakistan has a long history of cooperation with the America and China.

Given its strategic importance, Pakistan has ^{been able to} build strong diplomatic and strategic ties with the United States of America. The Global war on terror is one of the example of Pakistan's cooperation with America on strategic grounds. Pakistan has proved her true friendship by fighting against terrorism. Pakistan had lost billions of dollars, infrastructure, soldiers, and people during global war on terror after 9/11 incident.

America ^{has} also recognized our efforts to combat terrorism in the region.

On the other hand, China and Pakistan have also have friendly relationships. Pakistan has good trade, economic, security and diplomatic ties with China. Pakistan recognize China with whole heartedly at the time of its inception. China has always stands by with Pakistan during Pakistan's wars. Pakistan and China has cooperated on multiple grounds. China has brought huge investment in Pakistan with the name of CPEC. The multi billion dollars project is on going.

→ Pakistan's Foreign Policy for America, China and the world:

Our policy stance for the world including America and China

is that Pakistan wants good relationship with all. While discussing the Comprehensive Security Policy of Pakistan, Ex Pakistan National Security Policy advisor: Dr Moeed Saif said that "We are offering world for trade and economic bases not the military bases". Pakistan's foreign policy is very loud and clear providing avenue for both the countries and world for investment, trade and mutual cooperation.

→ The Global Power politics:

A real challenge for Pakistan is Rising China as a global power is challenging the hegemony of America in the world. According to some analysts China is increasing its influence in the world through regional cooperation. It emerges as a soft power as resolving conflicts between the old rivals: Iran and Saudi Arabia. Not only that China has made multiple billion dollars projects including Belt

and Road initiative (BRI) that brings huge investments in the nations who are part of it. The Critics take this move of China as trapping the nations in "debt" while taking countries under the influence.

America's State minister while his recent visit to Pakistan also stated that China is putting debt burden in the ~~form~~ of investment.

Similarly, China has reservations about Taiwan and America's deep ties (According to Internationalist Analysts). China also has considered America responsible for disturbing or interfering State's Sovereignty through non-conventional tactics and proxies, especially by separatist movements in China (Source: Chinese media).

Moreover, China's maritime trade routes are also disturbed by ^{the presence of} America, especially by the tensions at the Strait of

Malacca" in South China Sea.

All the corresponding factors
aid fuel in fire.

Pakistan for that matter,
is facing difficulty to
maintain its very balanced
position between the two
powerful states. Of course, being
a developing country the
development and the stable
economy would be its top
priority.

According to the one of University
professor at in USA and also
the think tank "Americas" would
welcome pak-china cooperation
as far as the economic interests
in needed areas of Pakistan
are concerned.

→ Required Strategies of
Pakistan to Sets

a- Holistic Approach

Pakistan should make
an holistic approach by considering
all the terms and conditions
and observing current scenarios
around the world

b- Strengthen diplomatic
relationship with America

Pakistan should take America under confidence and discussed its current challenges also.

→ Discuss America's reservations regarding Pakistan with China.

Pakistan should discuss the America's reservation with China and ask for full fledged support and back up in case of more economic chaos.

→ Make an effective and strong foreign policy

Pakistan should have to make an effective and strong foreign policy which reflects our economic & state interest more clearly.

→ Incentivize other developed countries to bring investment

Pakistan have both the human and natural resources in abundance. It should incentivize other developed world to bring investment in Pakistan.

→ Control political instability in the country

It is utmost for Pakistan to make sure the inner stability in the country first so that stabilizing economy would be remain as our major concern.

→ Switch On multiple Sources of Loan instead few: despite of govt and some other traditional loan sources, Pakistan should enhance its diplomatic ties with some other rich countries and urge for loans.

→ Increase think tanks for getting more effective and accurate policy. Pakistan the nation of ~about 230 million people have only a few think tanks. It is crucial for us to

engage people in planning their might bring best and a strategies.

→ Strengthen Agricultural and Industrial Sector

Strengthen inbuilt-Capacity means strengthening the economy. Once, Pakistan stabilize its economy it would be more easier for us to not to enter in any global political block for the sake of fulfilling our very needs.

In a nutshell, Pakistan has been an amazing relationship with both the countries: America and

China. The global politics
insisting Pakistan to
become part of one of
the block. However, Pakistan
has its very clear foreign
policy stance to not a
part of any block.
Rather Pakistan urge
to have friendly
relationship with both
the countries. Along with
that Pakistan welcome
all the nations for the
investment and mutual
Cooperation.
