Paragraph

"Economic woes"

Pakistan's economic crises are multifaceted. Since independence, Pakistan has to confront precarious economic crisis. Economic fragility has mainly started when country has relied on foreign loan instead focusing on its own resources. Moreover, economic deterioration has seriously impacted country's overall progress. Furthermore, economic crisis includes balance of payment crisis, fiscal deficit, depletion of foreign reserves, skyrocketing inflation coupled with depreciating rupee's value. Pakistan, however, needs a stable economy to exit the current scenario. For this, there is need of proper financial policies and implementation of those policies.
