

A state in a chaos and its near future.

A man get worried every day. He always thinks about his future, and his future is the biggest challenge for him. A man never knows how to deal with precarious situation prevailing in this country. A man tries to work hard but fails due to many challenges like inflation, unemployment, economic downfall, and others issues. Furthermore, poor utilization of resources are egregious one.

A man with a large family having a lot of expenses is perturbed due to the peril condition. when he has no source of income then what will he do. Eventually, he starts some sort of illegal activities that will lead him to crime. If he feels satisfied with crimes then he will become a criminal that will affect the whole society. In this way, crimes ratio increases in our country because people have to survive out of the jeopardizing situation.

They have to feed their children who are suffering from hunger. Their children are malnourished because of the lack of qualitative and quantitative food. These people are not criminals by birth but they opt crimes for their survival because state is not working efficiently, state extremely ruthless in that manner.

They donot have any kind of policies that would help common people in peril circumstances. state neither facilitate nor provide the people with the basic needs of life.

“Among All the monsters, state is the biggest one”

State is extremely rational in its practices. A state where 40 million children are out of school, almost 40 million people are below the poverty line according to the report of the United Nation. but the State has nothing to do with that type of statistical reports. A state where media is controlled by incumbent

institutions. Almost all the media channel is broadcasting their own interesting personalities. But no one is taking step to broadcast grievances of the poors who are suffering from hunger. The major lack of the media channel is that they are not representing the whole community but they are showing some faces that are involved in making miserabile condition of our country.

According to the **RSF** (Reporters without Borders.)

"Pakistan is 157 out of 180 countries in the Press Freedom Index"

The unpredictable situation of Pakistan is linked with the freedom of the media because a state where freedom of media and freedom of speech is exercised will result into a better future. Unfortunately, we are controlled by other biggest hegmons of the world. In current scenario, Political instability is the

most fatal cause of economic breakdown. Our economy is teetering on the brink of breakdown and is prone to destruction. Pakistan is facing economic deadlock since 1947. Furthermore, corruption paved the way towards bankruptcy and default. Corruption is very offendable crime that affect the growth of a nation. According to Transparency International,

"Pakistan stands 140 out of 180 countries in Global Corruption Index"

Above all the negative factors, there is still a way to get rid out of the instable condition. A system of check and balance is introduced for all the public office holders and very strict officers are responsible for the investigation of suspicious members. All the political parties should have a table talk with the incumbent government for the betterment of our country lagging

behind their personal interests aside.

But this seems to be pie in the sky when we take a look on our corrupt political leaders.

So what will be the future of Pakistan. It is highly prone to destruction. No one can understand why all deals with the IMF stand hampered. The government is putting efforts to restore the economy but fails. The case is that no one believes on us because they know that their investment will get vanished during the instability period in Pakistan. Therefore, no one is willing to invest in Pakistan.

Unfortunately, the behaviour of the Pakistani Politicians is extremely ruthless. One should always think that at what time Pakistan will get prosperous and we have a fascinating image in front of the international media. But all the steps taken by the government are opposite to one's thinking.

that hurt the feelings of the well wisher of Pakistan.

Instability in Pakistan is widely influenced due to the involvement of the international politics because of the geo-strategic location of the Pakistan is getting too much attraction from all other countries of the world. Many developing countries have their trade benefits with us. The Gwadar port is something like a blessing from God which paved the way towards Pakistan's development. The trade based countries are keeping an eye on its central position because the route is short as compared to the others. According to Goldman Sachs bank report 2022,

"Pakistan could be the world's sixth largest economy by 2075"

For Pakistan, it is a huge boost in development and will lift the economy up.
