

Title: Lack of Moral value: Problems and its Solutions

Bringing social morality is necessary for training human brain especially at present. Typically, teaching human mind is a greater challenge for education institutions. In the past, positive impacts of moral value were removed in our religions. Resultantly, the inappropriate behaviours have become problems for human being. Therefore, Machiavelli stated that powerful authority cannot understand the basic cause of immorality. However, educational sectors have potential to bring moral value through effective coaching but providing fundamental rights for humanity is also imperative.
