

Violation of Women Rights in Pakistan

Women in Pakistan has been violating through multiple tactics. The ratio of female population is 48 percent in Pakistan.

First, female children are being ~~from~~ forced to marriage because of traditional society. Females are being married whose are less than eighteen year, and the ratio is 18% in Pakistan, according to United Nation children's Funds in 2018.

Secondly, gender base violation is increasing with each passing day in the context of Pakistan. Moreover, women are working at multiple places: offices, educational institutions, industrial sectors, and agriculture sector. According to United Nation Population ^{fund}, 32% of women has been harassed at various work places in Pakistan. Hence, violation of women is the major social issue in Pakistan because women are the major contributor in Pakistan economy.
