

## Paragraph on

### "Out dated education System in Pak"

In today's advanced world, where different innovative methods of education system are practiced, Pakistan in this modern world is still practicing the outdated method of education. Pakistan's education system is based on rote-learning. Practical implementation of the knowledge is ignored. There is no connectivity of education to the industrial sector. Students are compelled to cram the syllabus just to obtain high mark while their improvement of intellectual level is being ignored. That's why, ~~hence~~ in the current scenario Pakistan is lacking skilled individuals. This inturn leads to the economic downturn of the country as the country has to call skilled individuals from other countries making its own youth unemployed. In a nutshell, we can say that Pakistan's education system is

not fitting with the contemporary  
world. which is causing a lot  
of difficulties for the country.
