ACADEMIC PARAGRAPH STRUCTURE

Sub-heading: Negative Effect of Social Media on Youth
by Causing Inferiority Complex.

Topic Sentence	There are various negative effects of social media on youth, one of them is inferiority complex.
Explanatory or Reasoning Sentence	The reason is that social media offers a wide-range of image enhancement filters, which leads to false perception of reality and intensifies the feeling of not being enough.
Supporting Point	Young social media users indulge in social comparison which leads to inferiority complex as they perceive themselves as inadequate. This feeling of inadequacy affects their everyday lives and make them drop wonderful opportunities by shattering their confidence.
Evidence/ Example	The studies prove that there is a correlation between social media usage and inferiority complex. For instance, social media icons create dreamy images in the minds of youth, which leads to the feeling of not being enough in terms of beauty and skill to impress others.
Conclusion	Hence, social media usage among youth leads to feeling of not being enough which consequently causes inferiority complex.
